

Dromex

FLAME RETARDANT & ANTI-STATIC REFLECTIVE VEST

SA11-ASFR

Description

Dromex® SA11-ASFR, Class 2 lime green flame retardant and anti-static, high visibility, torso reflective safety wear is intended to provide conspicuity of the wearer in any light condition when viewed by operators of vehicles or other mechanized equipment during daylight conditions and under illumination of headlights in the dark.

SA11-ASFR features a full zip closure system, identity card holder on the left breast and reflective tape on the front, back and waist of the jacket for enhanced visibility.

SA11-ASFR flame retardant construction is intended to protect the worker against occasional and brief contact with small igniting flames, in circumstances where there is no significant heat hazard and without presence of another type of heat used in the construction, warehouse and mining industry environments.

The Anti-static carbon activated thread, prevents static build-up in garments that is used by electronic assembly line staff and places where flammable liquids and gases are stored.

Class 2 safety vests are required by law for anyone working near or exposed to vehicle traffic, road construction crews, utility workers, survey crews, airport ground crews, law enforcement, railway workers, school crossing guards and toll gate personnel amongst others and in dark areas.

Compliance & Conformity

Tape:

- EN ISO 20471:2013 specifies requirements for high visibility clothing which is capable of visually signalling the user's presence.
- EN 469:2005 + A1:2006 + AC:2006 Protective clothing for firefighters - Performance requirements for protective clothing for firefighting.

Fabric:

- ISO 6330:2012 Textiles -- Domestic washing and drying procedures for textile testing.
 - EN ISO 14116:2008 Protective clothing -- Protection against heat and flame -- Limited flame spread materials, material assemblies and clothing.
- *Tested before and after five wash/dry cycles according to ISO 6330:2012 Procedure 4N (40°C) with tumble drying (Procedure F) and max 60°C outlet temperature.

Specifications

- Style: Class 2, high visibility, limited flame retardant, anti-static lime green vest, with zip closure, id card holder and reflective tape.
- Materials: Flame retardant 98% polyester lime green open, with 2% anti-static carbon tread.
- Fasteners: Nylon zip fastener with metal zipper.
- Reflective tape: Flame retardant 50mm silver micro glass bead.

Packaging, Storage & Obsolescence

Dromex® SA11-ASFR reflective wear is packed in individual polybags and sold as 50 units in a box.

When not in use or during transportation, the reflective wear should be stored in a container such that it is out of direct sunlight and not in contact with any chemicals, liquids or sharp objects.

Store in a cool dry place.

The reflective wear useful life is affected by many factors including the cold, heat, chemicals, sunlight and misuse. Stored correctly, reflective vests should have a shelf life of 3 years.

Sizes Available

XL to 3XL & 5XL.

Cleaning & maintenance

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Reflective safety wear should be disposed of considering the hazardous substances they were used for. Please consider recycling.
