PIGSPIT CANDY STRIPE GLOVES

88PBSA

Description

Dromex® 88PBSA pig skin split grain leather gloves are designed for rigging operations and general handling requiring abrasion resistance and breathability due to porous structure of the pig hide. Consists of pig split leather and cotton drilled candy striped fabric with a cotton laminated safety cuff. Gunn cut, winged thumb, with leather knuckle protection, pull tab, palm and leather padded fingers, with a shirred wrist for additional hold.

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Compliance & Conformity

Complies with the requirements of CE type examinations EN420 for innocuousness, pH value >3,5 <9,5, Chromium VI in leather shall not exceed 3,0 mg/kg and the size is correct.

Quality System conforms to ISO 9001:2008 and environmental management system ISO 14001:2015 system certificates or acceptable equivalent.

Specifications

Style: Gunn cut, wing thumb, with leather knuckle protection
 Liner: Cotton palm and fingers
 Palm: Split pig leather 1mm ± 5%
 Back: Candy striped drilled cotton 0.5mm ± 5%
 Cuff: Shirred cotton laminated safety cuff
 Mass: ±88g per pair

Packaging, Storage & Obsolescence

Packed 12 pairs per bundle and 120 pairs per carton for shipping. Store in a cool, dry place. Stored correctly, the gloves physical properties will not change for up to three years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended, especially if potential hazards exist. Before removal from the hands, excess contaminant should first be removed from the gloves. Should this not be possible, it is advisable to ease left and right-hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

How to decontaminate your leather glove.

Under no circumstances should leather submerged in water.

1. Prepare a lukewarm water solution using mild detergent.
2. Gently wipe your leather glove with a cloth.
3. In-order to reduce stiffening, allow the leather glove to dry naturally.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

Size Available

| Code | Size | Palm Length |
|--------|------|--------------|
| 88PBSA | L/10 | 125mm (±5mm) |

* As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.

* Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.

Measurement Guide

Materials

1. Wing thumb
2. Gunn cut
3. Knuckle protection
4. Shirred cuff
